

Occupational Health and Safety Objectives (FY 2017)

We operate health and safety proactively. In particular, this includes:

- the prevention of accidents at work
- the protection of the health of employees and external workforces

Derived from our company policy, we are implementing the following individual targets:

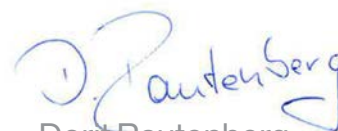

1. The safety and health of our employees, external employees and all partner companies and persons working at the shipyard are of the highest priority and are a key objective of our company
2. We actively encourage the awareness of work health and safety. **Our goal is: zero accidents**
3. Occupational safety and health protection are an integral part of all business processes and are consistently integrated from the outset - from the planning phase to project management
4. Prevention, namely to anticipate and take measures to maintain health and work safety, are responsibly co-managed by all employees
5. Management Executives set an example and are accountable for carrying out their assigned duties responsibly. The promotion of occupational health and work safety are management tasks
6. A key factor of occupational health and safety protection involves acting proactively and ensuring regular check-ups
7. The executive board, management executives and works council jointly pursue the objectives of occupational health and safety
